Dear Sir:

I was electrocuted in an apartment. After moving into this apartment I began hearing voices I could not tape, and at times there was a twittering sound. At the voices developed into a type of chorus that seemed to come from outside accompanied by a running conversation.

After the execution the voices said stay away from all Italians, lower class people, Southern people, black people foreigners, people of foreign extraction, women and to say nothing and do nothing and they would use what I had.

2

I asked for a Title Bond to insure that nothing in my life would be used. The Bond was given made up of various components in such a way that I could know what they were using and it was what I was talking about in the apartment. The apartment in which I lived was in a swimming pool complex. That I said has been used for six years. Since I have a Title Bond and nothing in my life can ever be used, I am now applying through a lawyer for my Title Insurance. I must receive triple damages and legal fees. The amount stipulated I know and no one is ever to come near me. Please notify or prosecute these persons who are involved in this as you have stated you would. My Title Bond states that myself and three other people that I

3

I will name to a lawyer will be forever free of these pests murderers or what ever they are. Earlier they wanted to know if the events noted constituted murder or population control (There is a theoretical structure explaining them).

Actually in this apartment I put these things in an upper class group. (I did this)

These voices are identifiable and they are among the pests that I hope will be prosecuted. Since these voices are constant day and night please see that they are stopped (I think they are simulated in some way because there is a voice now and then and I know it is not real. There has never been the voice of a person I would call a friend. Pictures, maps cartoons visual apparition can be made to appear a running conversation. There has been absolutely nothing of worth from the learner standpoint

4

Since my Life Insurance was deposited as soon as my material was used I was informed it would only be a matter of a few hours to claim damages. I was told never to use my name in applying.

The voices are identifiable and they are among the guys that I hope will be prosecuted since the conversation is filthy, ignorant, non-relevant at times violent backward, stupid, ridiculous, vicious. I am urging you to prosecute them. Since these voices are constant and there please see that they are stopped."

At one time they were supposed to put everything in the congressional record every three days.

5
The system of alliances, relationships, problems, methods of development solutions are such that I am aware that my work is being used. I was under the impression that this dynamic mechanism was copyrighted in my name. I know it cannot be used without being known to me.

This dynamic approach to a ~~great~~ vast amount of seemingly unrelated phenomena is entirely original. The dynamic mechanism is political at least it has a political component. This is why I am presenting to this agency.

6

although there are various components in the Bond the entire Bond would be a function of the Government or Governments involved - And the political component gives priorities so that it is a function of Government. I ~~can~~ ^{do} know the amount in the entire Bond.

I have been electrocuted and the political component is being used in a certain way. —

Please tell these people this is not for them - at all.

Yours truly,

My Life Insurance is because of this. I want these people
